15

For less daggerboard resistance  
remove front daggerboard brake  
from daggerboard housing cap.

16

### INSTALLING THE FLOTATION BAG

1. Insert bag under middle seat.
2. Secure ties around daggerboard well.
3. Inflate bag by blowing or pumping air into the smaller valve.

### ! WARNING

This flotation bag is not designed to replace a personal flotation device, clothing commensurate with the conditions, the practice of maintaining products in good working order, the "buddy system" (a rescue boat), or common sense.

The flotation bag will displace water captured in the hull if your Walker Bay boat capsizes while sailing. The bag will reduce the amount of water that needs to be bailed out of the hull, making it easier to right the boat and sail away.

## HOW TO ADJUST SAIL SIZE (Performance Plus Sail Kit only)

## WARNING

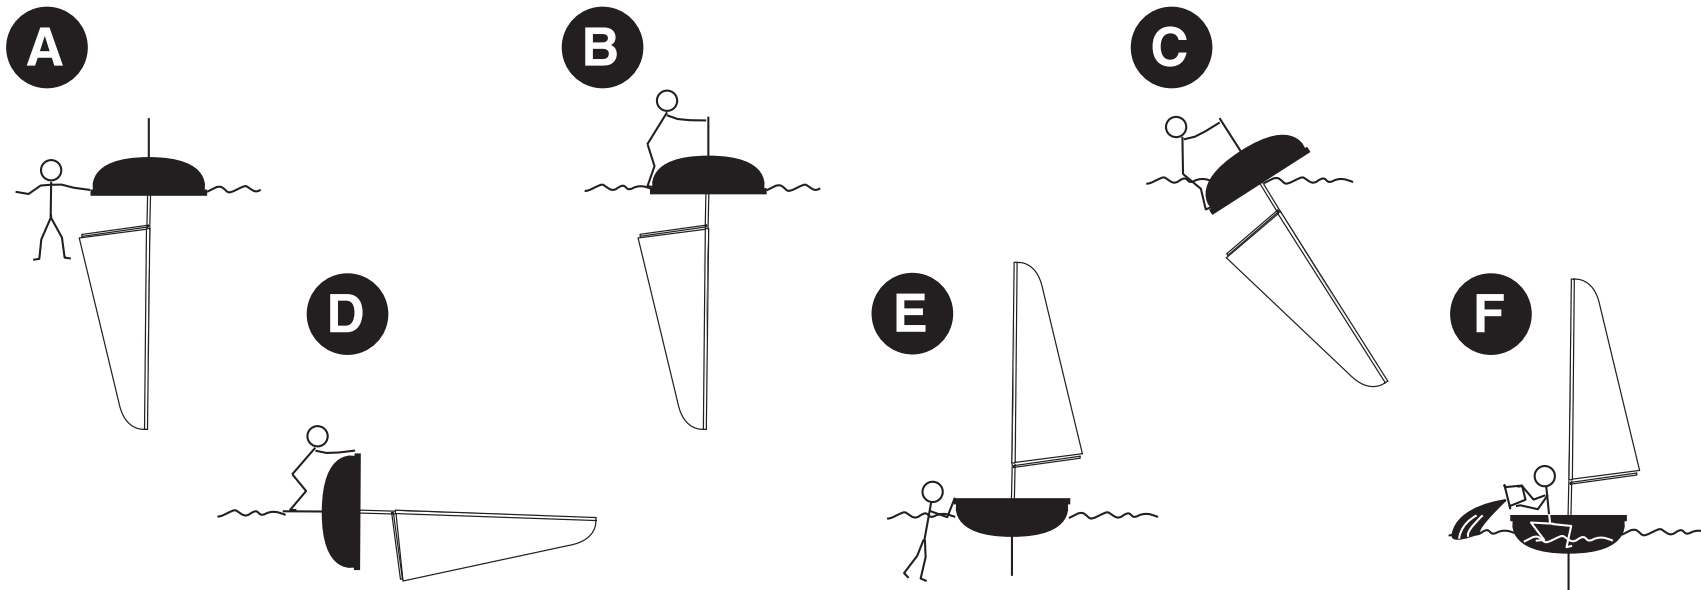

### IMPORTANT SAFETY INFORMATION

- READ OWNERS MANUAL. IMPROPER USE MAY CAUSE INJURY OR DEATH.
- EACH PASSENGER MUST HAVE AN APPROVED PERSONAL FLOTATION DEVICE.
